Python Conditional Statements – Assignments (No Loops)

1. Write a program to check whether a number is positive or negative.
2. Write a program to check whether a number is even or odd.
3. Write a program to check whether a person is eligible to vote or not.
4. Write a program to check whether a number is greater than 100 or not.
5. Write a program to check whether a given year is a leap year or not.
6. Write a program to compare two numbers and print the greater one.
7. Write a program to check whether a character is a vowel or consonant.
8. Write a program to check whether a number is divisible by 5 or not.
9. Write a program to check whether a student has passed or failed (pass marks = 40).
10. Write a program to check whether a number is a single-digit number or not.
11. Write a program to check whether a temperature is hot (>30) or cold.
12. Write a program to check whether a person is a child or adult (age < 18).
13. Write a program to check whether a number is zero or non-zero.
14. Write a program to check whether a given character is uppercase or lowercase.
15. Write a program to check whether a number is divisible by both 3 and 7 or not.
16. Write a program to find the greatest of three numbers.
17. Write a program to check grade based on marks (A, B, C, Fail).
18. Write a program to check whether a number is positive, negative, or zero.
19. Write a program to print the day name based on day number (1–7).
20. Write a program to check ticket price based on age.
21. Write a program to find the smallest of three numbers.
22. Write a program to check salary bonus based on years of service.
23. Write a program to calculate electricity bill based on units consumed.
24. Write a program to check exam results (Distinction, First Class, Pass, Fail).
25. Write a program to check whether a triangle is equilateral, isosceles, or scalene.

26. Write a program to check month names based on month number.

27. Write a program to check login status based on username and password.

28. Write a program to calculate discounts based on total shopping amount.

29. Write a program to check blood donation eligibility based on age and weight.

30. Write a program to check the type of number (single, double, or three digit).

31. Write a program to check whether a number is positive and even using nested if.

32. Write a program to check whether a student is eligible for an exam (attendance + marks).

33. Write a program to check whether a person can apply for a loan.

34. Write a program to check whether a year is a leap year and century year.

35. Write a program to check whether a number is divisible by 3 and 5.

36. Write a program to check whether a person is eligible for a driving license.

37. Write a program to check whether a number lies between 10 and 50.

38. Write a program to check whether a student passed all subjects.

39. Write a program to check whether a number is greater than 0 and less than 100.

40. Write a program to check whether a password is valid using nested if.

41. Write a program to print weekday name using match case.

42. Write a program to perform calculator operations using match case.

43. Write a program to print month days using match case.

44. Write a program to check traffic signal actions using match case.

45. Write a program to print menu-based food selection using match case.

46. Write a program to print grade description using match case.

47. Write a program to check user role (admin, user, guest) using match case.

48. Write a program to print language choice using match case.

49. Write a program to print result status using match case.

50. Write a program to build a simple ATM menu using a match case.
